数強塾

次の計算をしなさい。

$$\begin{aligned}\square(1) & (+4) - (-6) + (-3) \\ & = +4 + 6 - 3 \\ & = (+10) - 3 \\ & = +7\end{aligned}$$

$$\begin{aligned}\square(2) & (+3.4) + (-6.1) \\ & = +3.4 - 6.1 \\ & = -(6.1 - 3.4) \\ & = -2.7\end{aligned}$$

$$\begin{aligned}\square(3) & (-5.1) - (-3.8) \\ & = -5.1 + 3.8 \\ & = -(5.1 - 3.8) \\ & = -1.3\end{aligned}$$

$$\begin{aligned}\square(4) & (+16) - (+28) \\ & = +16 - 28 \\ & = -(28 - 16) \\ & = -12\end{aligned}$$

$$\begin{aligned}\square(5) & (-14) - (-17) \\ & = -14 + 17 \\ & = +(17 - 14) \\ & = +3\end{aligned}$$

$$\begin{aligned}\square(6) & (-14) + (+31) \\ & = -14 + 31 \\ & = +(31 - 14) \\ & = +17\end{aligned}$$

$$\begin{aligned}\square(7) & (-16) - (+23) \\ & = -16 - 23 \\ & = -(16 + 23) \\ & = -39\end{aligned}$$

$$\begin{aligned}\square(8) & (-17) + (+17) \\ & = -17 + 17 \\ & = 0\end{aligned}$$
